PROFILE

Full-Stack Developer with production experience building multi-module business web applications using React.js, Node.js, Express.js, and MongoDB. Built a complete CRM system with dual-role dashboards, deal pipeline tracking, and AI assistant integration. Comfortable with end-to-end development — REST API design to responsive UI. Seeking full-time roles in product and SaaS startups.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL

Frontend: React.js, HTML5, CSS3, Responsive Design

Backend & Cloud: Node.js, Express.js, REST APIs, AWS (EC2)

Database: MongoDB, PostgreSQL

Tools: Git, GitHub, Postman, Docker

Core Concepts: JWT Authentication, Role-Based Access Control, Dashboard Development, API Development

EXPERIENCE

MERN Stack Developer Intern – Team1 Consulting Pvt. Ltd., Noida

Jun 2025 – Jul 2025 | [Certificate](#)

- Built a production-ready full-stack CRM portal with 5 core business modules — Leads, Contacts, Accounts, Deals, and Tasks — serving dual user roles (Admin and Seller).
- Designed and implemented all REST APIs with JWT-based authentication and role-based access control, ensuring secure data separation between user roles.
- Built dual analytics dashboards — Admin view for company-wide KPIs and revenue tracking, Seller view for individual deal and task performance.
- Integrated an AI assistant feature directly within the CRM interface for contextual user support.
- Delivered fully responsive React.js UI across all modules with consistent component architecture.

PROJECTS

CRM Portal | *React.js, Node.js, Express.js, MongoDB, JWT Auth* | github.com/akarshjjain/crm-portal-mern

- Full-stack CRM with role-based access control, multi-stage deal pipeline (Budgetary/Upside/Commit), and analytics dashboards for business operations.
- End-to-end implementation: schema design, REST APIs, frontend components, authentication, and AI assistant integration.

Intelligent Lift Emergency Assistance System (ILEAS) | *Python, OpenCV, CNN, IoT* | [Link](#)

- Developed AI-powered lift safety system to detect malfunctions and abnormal motion events.
- Implemented real-time emergency alerts and passenger assistance prioritization logic.
- Recognized for innovation by department leadership.

Sentiment Analysis on Product Reviews | *Python, NLP, Machine Learning*

- Built review classification system for positive, negative, and neutral sentiment detection.
- Used VADER and machine learning models to generate customer insight reports.

Crime Data Analysis | *Python, Data Analytics, Machine Learning*

- Analyzed crime datasets to identify patterns, hotspots, and predictive trends.
- Built visual dashboards and reports for actionable decision-making insights.

EDUCATION

- **Jaypee Institute of Information Technology - Noida, UP | Bachelor of Technology**
Electronics and Communication Engineering | 2022-26 | CGPA 7.2
Minor Specialization: Data Science and Data Analytics | 2024-26
